FIELD OF STUDY

- Software Development Engineering
- Web Development
- Human Computer Interaction
- Game Development
- Networking and Telecommunication
- Cybersecurity
- Big Data
- Artificial Intelligence

TECHNICAL SKILLS

- Neovim
- Linux
- MySQL
- Github
- Figma
- Obsidian
- Google Editors Suite
- Microsoft Office Suite
- Adobe Creative Suite

LANGUAGES

- C
- C++
- Java
- Python
- SQL
- ReactJS
- HTML / CSS
- GDScript
- Markdown
- LaTeX

OBJECTIVES

1

To expose myself to the industrial environment in designing intuitive interfaces and graphic visualizations that enhance user engagement and accessibility. Passionate about blending design and functionality to create impactful digital experiences through interactive visual contents and software application.

2

To learn outside the classroom on programming and get familiar with cybersecurity principles and networking. Excited to leverage my interdisciplinary skills, as a player of a dynamic technology team, in innovative projects and contribute to build secure applications.

EDUCATION

Sungkyunkwan University (SKKU) (2022 - PRESENT)
Degree in Software

Courses Taken

- **1st Year (2022):** Linear Algebra, Basis in Programming, Discrete Math, Data Structure
- **2nd Year (2023):** System Programming, Computer Architecture, JAVA Programming Language, Algorithm, Web Programming, Logic Circuit
- **3rd Year (2024):** Artificial Intelligence, Database, Computer Network, Computer Engineering, Big Data and Analysis, Operating System, Programming Language, Human Computer Interaction, Real Time System, Technical Writing and Presentation

UniKL Malaysian Institute of Information Technology (MIIT) (2020 - 2021)
Pre Korea Foundation

- Korean Language, Fundamental of Information Systems, Object Oriented Programming, Principles of Programming, PC Hardware and Maintenance

SM Sains Tapah (SESTA) (2015 - 2019)
Science Stream High School Diploma

PROJECT EXPERIENCE

the-mee-null <https://github.com/fatinul/the-mee-null>
CLI-based application to decorate any bash terminal using ftxui

KingoGrad

Lead Designer for the grade checking project that incorporate ReactJS

How - Tel <https://github.com/fatinul/How-Tel>

Lead coder of the Hotel Booking website for the final project of Web Programming Lab.

cycle tinul.itch.io/cycle

Button mash game for the My-First-Game Jam using Godot

GameRec <https://github.com/Maissan26/game-recommender>

Collaborative side project that recommend games for you (Ongoing)
